

## 1,2,3,9-TETRAHYDRO-4H-CARBAZOL-4-ONE

CAS No: 15128-52-6

### CHEMICAL IDENTIFICATION

Molecular Formula	$C_{12}H_{11}NO$	Product Category	Carvedilol & Ondansetron Intermediate
Molecular Weight	185.22 g/mol	Quality Standard	GMP / In-House Specifications

### PRODUCT SPECIFICATIONS

Test Parameter	Specification Limit	Analytical Method
Appearance / Color	Off-white to Pale Yellow Powder	Visual Inspection
Purity (HPLC)	≥ 99.0%	Chromatographic (HPLC/GC)
Melting Point / Range	220.0°C – 225.0°C	Capillary Melting Method
Loss on Drying (LOD)	≤ 0.50%	Karl Fischer / Oven Drying
Residue on Ignition / Ash	≤ 0.10%	Muffle Furnace (Gravimetric)
Heavy Metals	≤ 10 ppm	ICP-OES / Limit Test

### COMMERCIAL & SYNTHESIS APPLICATIONS

A versatile dual-use intermediate. Essential precursor for the synthesis of Ondansetron (anti-emetic) and the beta-blocker drug Carvedilol (used in treating hypertension and congestive heart failure).

### PACKAGING, STORAGE & HANDLING

**Packaging:** 25 Kg fiber drum with double polyethylene inner liners.

**Storage:** Store in a dry, well-ventilated warehouse. Keep container tightly sealed and protected from direct sunlight.

**Handling:** Wear appropriate PPE (safety goggles, gloves). Avoid generating or breathing dust. Wash thoroughly after handling.

### QUALITY ASSURANCE & DISCLAIMER

Kalpasthana Life Care Products Pvt. Ltd. certifies that all pharmaceutical intermediates are manufactured, analyzed, and packaged under rigid quality compliance systems. Dispatch shipments are accompanied by batch-specific Certificates of Analysis (COA).

**Disclaimer:** The technical guidelines in this datasheet are accurate based on our internal findings at publication. It is provided for informational and safety guidance only. Customers must perform their own analytical and process testing to verify suitability of the material for their target formulations and reactions.
